EnergyIQ and Volant Solutions announce the integration of EIQ TDM and ENVOY™ for transferring data

Enable TDM users to efficiently exchange data with geoscience applications like PETRA, Geographix and OpenWorks.

(USA, Houston, TX: October 24, 2011) Volant Solutions (www.volantsolutions.com) and EnergyIQ (www.energyiq.info) have announced a strategic partnership to deliver a full-featured PPDM-based data management and integration solution for the Upstream Energy industry. This partnership has directly resulted in the availability of a solution that brings together EnergyIQ's PPDM-based Trusted Data Manager™ (TDM) software and Volant's ENVOY™ integration platform. This integrated solution will provide users with the ability to easily transfer data between TDM and various commercial applications such as PETRA, OpenWorks and Geographix. The announcement was made at the [PPDM Data Management Symposium and Tradeshow](#) in Calgary, Alberta.

"This agreement with EnergyIQ enables Volant to provide TDM customers with the ability to easily get data in and out of their interpretation applications via Volant's ENVOY integration platform", said Scott Schneider, President and CEO of Volant. "The ability to plug our ENVOY product into the TDM application will provide geotechs and geoscientists with a seamless ability to transfer data between TDM and applications like PETRA, Geographix and OpenWorks. With future plans to integrate additional geoscience applications into the TDM product, EnergyIQ and Volant can support additional workflows to meet our client's enterprisedata management needs."

Future plans for the collaboration between Volant and EnergyIQ call to add support for Petrel, GeoFrame, Paradigm and Geographix, which are already supported by the ENVOY platform.

"The agreement with Volant Solutions provides our TDM customers with the ability to effectively manage their most trusted data and seamlessly make it available to end users in their preferred applications. In addition, the ability to capture end user changes within the TDM ensures that the knowledge of the organization is retained," said Steve Cooper, EnergyIQ President and CEO. "The integration between the EnergyIQ TDM and the Volant Solutions' connectivity offerings establishes an effective data management platform for both small and large organizations."

About Volant Solutions

Volant Solutions (www.volantsolutions.com) is an independent software vendor with significant experience developing and delivering software solutions that automate and integrate technical data, applications and workflow processes. Volant's EnerConnect™ and ENVOY product lines are the solutions of choice for numerous industry leading Upstream Oil & Gas companies to integrate their key geoscience databases and applications.
